Author Index for Volume 56 (2002)

Abdous, B., S. Germain and N. Ghazzali, A unified treatment of direct and indirect estimation of a probability density and its derivatives	(3)	239–250
Agostinelli, C., Robust model selection in regression via weighted likelihood methodology	(3)	289–300
Asmussen, S., V. Kalashnikov, D. Konstantinides, C. Klüppelberg and G. Tsitsiashvili, A local limit theorem for random walk maxima with heavy tails	(4)	399–4041
Aue, A. and J. Steinebach, A note on estimating the change-point of a gradually changing stochastic process	(2)	177–191
Bailey, B.J.R., *see* Liu, W.	(1)	1– 5
Barakat, H.M., On the confidence region for the bivariate co-ordinate-wise quantiles of the continuous bivariate distribution functions	(1)	37– 43
Basak, I., *see* Basak, P.	(4)	395–398
Basak, P. and I. Basak, Unimodality of the distribution of record statistics	(4)	395–398
Berti, P. and P. Rigo, A uniform limit theorem for predictive distributions	(2)	113–120
Blei, R.C. and N. Towghi, Variations of Frechet measures of p-stable motions	(4)	355–360
Burman, P., Estimation of equifrequency histograms	(3)	227–238
Carrière, K.C., *see* Huh, J.	(3)	329–339
Cline, D.B.H. and H.-m.H. Pu, A note on a simple Markov bilinear stochastic process	(3)	283–288
De Gooijer, J.G., A. Gannoun and D. Zerom, Mean squared error properties of the kernel-based multi-stage median predictor for time series	(1)	51– 56
Dubnicka, S.R., Testing against ordered alternatives for multivariate censored survival data	(2)	207–216
Field, C., *see* Qian, G.	(1)	101–112
Fu, J.C., F.A. Spiring and H. Xie, On the average run lengths of quality control schemes using a Markov chain approach	(4)	369–380
Gannoun, A., *see* De Gooijer, J.G.	(1)	51– 56
Germain, S., *see* Abdous, B.	(3)	239–250
Ghazzali, N., *see* Abdous, B.	(3)	239–250
Glynn, P.W. and D. Ormoneit, Hoeffding's inequality for uniformly ergodic Markov chains	(2)	143–146
Govindarajulu, Z., *see* Nugroho, S.	(4)	431–437
Györfi, L. and I. Vajda, Asymptotic distributions for goodness-of-fit statistics in a sequence of multinomial models	(1)	57– 67
Hadjicostas, P., Symmetric and isomorphic properties of qualitative probability structures on a finite set	(3)	309–319
Hildebrand, M., A note on various holding probabilities for random lazy random walks on finite groups	(2)	199–206
Hofmann, G. and H.N. Nagaraja, A random power record model	(4)	345–353
Hooghiemstra, G., On explicit occupation time distributions for Brownian processes	(4)	405–417
Hu, M., *see* Rosenberger, W.F.	(2)	155–161
Huang, S.-Y., On a Bayesian aspect for soft wavelet shrinkage estimation under an asymmetric Linex loss	(2)	171–175
Huh, J. and K.C. Carrière, Estimation of regression functions with a discontinuity in a derivative with local polynomial fits	(3)	329–339
Jiménez, R. and J.E. Yukich, Strong laws for Euclidean graphs with general edge weights	(3)	251–259
Jones, M.C., A dependent bivariate t distribution with marginals on different degrees of freedom	(2)	163–170
Kalashnikov, V., *see* Asmussen, S.	(4)	399–404
Kang, Y.-G., *see* Low, M.G.	(4)	361–367
Klüppelberg, C., *see* Asmussen, S.	(4)	399–404
Konsowa, M.H., Random walks on trees and the law of iterated logarithm	(2)	193–197
Konstantinides, D., *see* Asmussen, S.	(4)	399–404
Kosorok, M.R., On global consistency of a bivariate survival estimator under univariate censoring	(4)	439–446
Kwong, K.-S. and E.-H. Wong, A more powerful step-up procedure for controlling the false discovery rate under independence	(2)	217–225
Lee, S. and S. Na, On the Bickel–Rosenblatt test for first-order autoregressive models	(1)	23– 35
Lee, S. and Z. Su, The symmetry in the martingale inequality	(1)	83– 91

Elsevier Science B.V.
